

Freetown – September 2021

Eversource held an update call with the group members June 7th to discuss the results of the steady state analysis. Eversource is finalizing the PSCAD dynamic analysis and will present the dynamic results to customers in October.

Eversource's intention is to keep all customers regularly informed (at least monthly) on the progress and discuss any significant risks or concerns Eversource encounters during the analysis. Factors that may impact the completion schedule and associated activities include but are not limited to: base case modeling issues; DER stability model issues; solution development for potential adverse system impacts; and/or significant Member Impact changes requiring review.
