

Eversource Distribution Group Study Update – June 2023

Eversource is forming new Groups to perform Group Study to determine the scope of required modifications to Eversource's electric power system to provide interconnection service in this area. The Group will consist of applicants currently in the Company's interconnection queue in this area. Potential modifications to the following substations along with other potential system modifications, will be reviewed as part of the individual Group Study at each of the Substations below:

1. Southwick 29A Substation
2. Maynard 416 Substation
3. Walpole 146 Substation

Pursuant to Section 3.4.1(a) of the Company's Standards for Interconnection of Distributed Generation (the "Interconnection Tariff"), the Company will accept completed Interconnection Applications for this Group Study for a period not to exceed 40 business days from June 9, 2023 (and due by August 8, 2023). The Company, in its sole discretion, may close the Group Window earlier. If an application is not deemed complete within the Group Window, it will not be included in the Group, even if the application was received within the Group Window. After the end of the Group Window, Eversource will proceed based on the provisions of Section 3.4.1 of the Interconnection Tariff.
